

# Advanced Plant Science and Landscape Design Diploma (Horticulture) Level 3

16-19

Adult

Plants play an incredibly important role in all our lives by providing us with oxygen and food sources. As a horticulturalist you will need to use your scientific knowledge of plants and soil to grow a wide variety of fruits, vegetables, shrubs, flowers and grass while considering sustainability and conservation. You may work in formal gardens or designing domestic spaces, plant and food production or working to enhance wildlife and diversity. Our courses will give you all the in-depth knowledge you need to start your career, with the option of continuing on to university study with one of our degrees at the iconic Eden Project.

The course is a full-time college course with four days in college plus work experience progressing from one to two years.

As a modern sustainable horticulturalist you'll need a range of skills including; scientific knowledge of plants, soil, pest and diseases and a wide variety of practical skills such as planting, pruning and hard landscaping, including experience and certificates allowing you to use a range of machinery and equipment including your PA! spraying certificate and experience using petrol and battery mowers, strimmers, hedge trimmers and more.

This level 3 course is for learners who are interested in developing the specific technical and professional skills and knowledge that will lead to meaningful employment in the horticulture and landscaping industry. Learners will explore a wide range of industry areas.

You would take this qualification if you really enjoy the practical aspects of working in an outdoor horticultural setting. Employment opportunities that may arise from doing this qualification are very much 'operative' roles i.e. hands-on.

Successful completion of this course will result in the Awarding of City and Guilds Advanced Technical Diploma in Horticulture.
