

RHS Level 2 certificate in the principles of horticulture

Adult

This is a great course for those wanting to underpin their practical skill with theoretical knowledge. This course starts in September and is one full day a week on a Monday. It is great for professional horticulturalists and enthusiastic amateurs. There is a level of commitment required to revise for the exams.

Attainment of both the Certificate in Practical Horticulture and the Certificate in the Principles of Horticulture will result in learners achieving the Level 2 Certificate in the Principles and Practices of Horticulture. The combination of theoretical knowledge and hands-on skills will provide fully rounded capabilities. A formal certificate is issued by the RHS on successful completion of the qualification the learner is enrolled on.
